FULL STACK DEVELOPER

Experienced and highly skilled professional with 6+ years of expertise in JavaScript, TypeScript, and a range of frameworks and libraries including Angular, React.js, Next.js, Node.js, Bootstrap, Tailwind CSS, and Ionic. Proficient in building web applications and mobile apps, with a strong focus on UI design and development. Proven ability to deliver high-quality and scalable solutions. Seeking opportunities to utilize my skills and contribute to innovative projects.

SKILLS

HTML	Angular	Node JS
CSS	React JS	Sanity
Javascript	Next JS	Tailwind CSS
Typscript	Ionic	Bootstrap

PROFESSIONAL EXPERIENCE

Senior Software Engineer   **April 2023 - Present**
DNA Infotech private limited (Client - HMI Group - Singapore)

- Developed a responsive and intuitive patient portal using React.js and Next.js, providing healthcare providers with a secure platform for seamless communication and appointment scheduling.

- Implemented a real-time symptom tracker using React.js and Next.js, allowing patients to easily monitor their health status and share updates with healthcare professionals, leading to improved remote patient monitoring.

- Integrated Sanity CMS with the website, enabling healthcare administrators to efficiently manage and update content, such as medical news, blogs, and treatment information, ensuring accurate and up-to-date information for patients and visitors.

- Optimized website performance by utilizing Next.js server-side rendering capabilities, resulting in faster page load times and a smoother user experience for healthcare website visitors.

- Developed an interactive data visualization dashboard using React.js, Next.js, and Sanity to display healthcare analytics, providing healthcare professionals with actionable insights for informed decision-making and improving patient outcomes.

Senior Software Engineer   **May 2019 - April 2023**

Lakeba IT Solutions, Coimbatore

- Successfully developed an intuitive admin portal using Angular, providing administrators with a powerful and user-friendly interface to manage vehicle assessment data, track performance metrics, and generate insightful reports, resulting in streamlined operations and improved decision-making.

- Built a responsive web app using Ionic, allowing users to assess vehicles on-the-go using their mobile devices, capturing data and generating assessment reports in real-time, providing a convenient and efficient solution for vehicle assessment professionals.

- Integrated advanced features in the admin portal using Angular, such as user authentication, role-based access control, and data visualization, ensuring secure and personalized access to the vehicle assessment system, enhancing data privacy and improving user experience for administrators.

- Utilized Ionic to create a visually appealing and user-friendly web app interface, optimized for mobile devices, allowing vehicle assessors to easily navigate through the assessment process, capture relevant information, and generate comprehensive reports, leading to increased productivity and accuracy.

- Implemented seamless data synchronization between the admin portal and the web app using Angular and Ionic, ensuring that assessment data is accurately shared and updated between the two interfaces, enabling efficient collaboration and data consistency.

FULL STACK DEVELOPER   May 2017 - April 2019

Aroliant Internet Private Limited, Coimbatore

- Successfully developed and deployed multiple ecommerce websites using Angular, catering to different niche markets and product categories, resulting in increased online sales and brand recognition for each website.

- Implemented a centralized admin portal using Angular, allowing administrators to efficiently manage multiple ecommerce websites from a single interface, streamlining product management, inventory control, order processing, and customer support across all websites.

- Utilized Angular to create responsive and visually appealing website interfaces for each ecommerce site, ensuring a consistent and seamless user experience across different devices and screen sizes, leading to improved customer engagement and conversion rates.

- Integrated complex pricing and discounting mechanisms using Angular, allowing for flexible pricing strategies and promotional campaigns across multiple ecommerce websites, enhancing customer acquisition and retention.

- Implemented advanced search and filtering capabilities across all ecommerce websites using Angular, enabling customers to easily find and purchase products based on specific attributes and criteria, resulting in improved customer satisfaction and product discoverability.
